

Supreme SlipTech™ Anti-Fatigue Comfort Mat

- 3/16” thick Rubberized large pyramid pattern top bonded to 1/2” enhanced ErgoFlex PVC foam base.
- Rubberized surface offers extended durability, much improved traction and resists most chemicals.
- Pyramid surface pattern provides 8% better traction (coefficient of friction) compared to diamond plate.
- Overall 11/16” thickness with a 3-year Limited Warranty against wear and delamination!
- Standard Sizes **3'x 5' / 3'x 5' / 3'x 10'** and standard runner rolls **2'x 60' / 3'x 60' / 4'x 60'**
- Beveled edges on all mats and rolls to prevent tripping.
- **AmericanMadeSupplies.com** **(866) 654-4808** ... 100% American Made matting products.

Anti-Fatigue ergonomic matting works through the use of an inner closed cell foam structure. This foam has a “spring effect” which causes constant motion of the feet and lower legs. This constant motion in the legs keeps fresh blood flow and oxygen going to the muscles. The extra blood flow to the muscles keeps them oxygenated. The result is decreased pain and fatigue in those muscles of the feet and lower legs at the end of the day.

Ideal for assembly lines, workstations and laboratories providing a durable vinyl skin surface permanently bonded to a buoyant sponge backing. Industrial Pyramid pattern top surface helps prevent slipping. Available with yellow safety border that meets OSHA requirements. Beveled edge helps prevent tripping. Mop or sweep to clean.

AmericanMadeSupplies.com is one of the **MainStreetE.com** owned & operated family of on-line stores.
